

## Press release

### **Inventec previews its VRSTATE metaverse platform**

#### COMPUTEX Taipei 2023 debut

Taipei, April 28, 2023 – Inventec Corporation (2356), a major manufacturer of notebook computers and servers, plans participation in COMPUTEX Taipei 2023, set to open on May 30th this year, with the VRSTATE metaverse platform.

Inventec has a long-term investment in the research and application of digital technologies, including artificial intelligence, automotive electronics, 5G private networks, and the metaverse. The company's current research in the metaverse is focused on the latest technologies: AI generated content, digital twins, virtual physical fusions, and augmented reality. Inventec's VRSTATE is designed on the foundation of the "Virtual Physical Realm" (VPR) project developed in 2005 and follows the vision of "introducing the virtual with the real, and bringing the real with the virtual." The platform integrates digital economy spaces, digital content creation, AI model training, and digital security governance, among other innovative applications.

At COMPUTEX Taipei 2023, Inventec will showcase the VRSTATE Expo, VRSTATE Hall, VRSTATE Innovation, among other original metaverse applications, and exhibit the latest safety, connectivity, and computing products from Inventec Automotive Electronics including Advanced Driver Assistance Systems (ADAS), Central Gateway, and e-Cockpit system.

Inventec VRSTATE that this is an excellent opportunity. In this global exhibition, Inventec will display its latest system software cloud technology combined with the powerful computing power of AI servers and engage in explore with world-class technology partners. Users can also experience the exhilarating and convenient effects of the new metaverse era.

In addition to the metaverse upgrade needs of businesses, Inventec aims to launch the Incubation Metaverse, Education Metaverse, Arts & Culture Metaverse, Industrial Metaverse, Entertainment Metaverse, and much more. Inventec plans to promote the new business model of the metaverse industry chain and ecosystem by gathering companies, the government, academia, and research organizations. To achieve this goal, Inventec will offer metaverse space and zones, where businesses are welcome to settle in and jointly create a digital economic circle platform to collaboratively achieve financial success.
